## 世界清洁能源大会·中国2010 Global Clean Energy Congress • China 2010

## 会议结构 CONGRESS STRUCTURE

展望“十二五”能源规划，推进能源结构优化

10月18-21日 中国·北京希尔顿逸林酒店  
October 18-21, 2010 Doubletree Hilton Hotel, Beijing China

With the continuous growth of the global industrialization, the traditional fossil fuel energy is generally running out. For the sustainable development of all the man kinds, developing new type of renewable energy has become consensus for all countries.

China has the responsibility for bearing the heavy task of meeting the energy demand from one fifth of world population. And at the same time, there is a large potential for developing renewable energy for its vast land with rich resources. However, the renewable energy industry in China is just in the initial stage, on the basis of keeping its own advantages, China should also strengthen the international cooperation.

Global Clean Energy Congress•China 2010 provides a systematic analysis and all-directional view into the renewable energy industry by 7 specialized and high-level summits, World Wind Energy Summit, World Photovoltaic Summit, World Bioenergy Summit, World Nuclear Energy Summit, China Carbon Market Summit, World Strong Smart Grid Summit and China Geothermal Energy Cascade Development & Pump Technology Summit, gathering with senior management levels and top experts from government, authorities, institutes, project owners, solution providers, equipment (part) and material providers etc from home and abroad in clean energy industry.

The Global Clean Energy Congress•China 2010 not only brings the latest information of scientific technology, upcoming projects and enterprise strategies, but it is also a good communication platform for you to exploit your market.
